Background and Methodology

Due to the worsening security situation inside Syria, REACH Initiative (REACH) is conducting rapid assessments to monitor the influx and needs of Syrian refugees recently displaced to the Kurdistan Region of Iraq (KR-I). In order to inform and provide an evidence-base for humanitarian planning, the REACH Iraq team launched data collection close to the Syrian border, to capture the demographics, needs and displacement history of those crossing from Syria into the areas surrounding Al Walid, Sahila and Kalhi villages in the KR-I. To gather this information, REACH conducted Key Informant (KI) interviews, with one nominated KI per travel group responding on behalf of the travel group.

This 21st output reflects data collected in Sahila on between 28-30 of January, 1st and 3rd of February 2020. In total, 28 KIs were interviewed on behalf of their travel groups (225 displaced individuals). As data is collected through KIs and only on specific days, results should be considered indicative and are not statistically representative.

Situation Overview

Since the outbreak of conflict on 9 October 2019, residents of Northeast Syria (NES) are experiencing a new humanitarian crisis, resulting in massive displacement from the region, both internally and, to a lesser extent, towards the KR-I. As of 18 December 2019, the UN estimated that 70,590 people² remain displaced, while UNHCR reported 20,224 refugees³ crossing into the KR-I between 9 October and 3 February. Days after a ceasefire agreement was reached on 17 October, a sharp decrease in daily refugee arrivals was observed. New refugee arrivals have been screened between the villages of Al Walid, Sahila and Kalhi in the KR-I, and have then been moved to Bardarash and Gawilan camps for registration.

There were on average 32 new arrivals per day over the last week, which is a slight decrease compared to previous weeks. Numbers have been fluctuating on a daily basis, which may in part be due to adverse weather conditions. In this update, the most commonly reported recent districts of residence in Syria were Quamishli, Al-Hasakeh, Ras Al Ain and Ain Al-Arab. Furthermore, travelling by foot remained the primary mode of transportation, and was reported by 89% of KIs. Some groups were able to complete the journey to the border in a day, though 61% reported having travelled for several days. For most travel groups, lack of water, lack of food and challenges of travelling with children and elderly were reported as the most commonly encountered difficulties on the journey. Similar to former updates, KIs reported that the lack of livelihood, arrival of armed groups and airstrikes were the most common push factors to leave their place of residence in Syria.

Demographics

Demographics of the Displaced Groups

Average size of travel groups as indicated by KIs: 5

Demographic breakdown by age and gender as reported by KIs:

- 72% male | 28% female
- 1% Over 60
- 18% 18-60
- 9% 0-17

Displacement

All KIs reported that travel groups had to pay someone to cross from Syria, as was reported in previous updates. Travel groups reportedly paid on average 90 USD per person (450 USD per group), which is lower than the former updates. Most KIs reported no food (79%) and no water (64%) as difficulties experienced on the journey. Twenty-five percent (25%) of the travel groups had reportedly travelled for more than seven days, compared to 32% in the last round and 40% in the one before it.

Displacement Routes

Most commonly reported difficulties experienced on the journey, according to KIs:

- No food 79%
- No water 64%
- Travelling with children/elderly 32%
- Blocked/refused access along the journey to reach here 25%

Reported reasons for choice of displacement route, according to KIs:

- Perceived safest route 85%
- Recommended by family/friends 4%
- Shortest route to destination 7%
- Perceived as leading to preferred destination 4%

Most commonly reported primary modes of transport travel groups used to crossing point from most recent residence location, according to KIs:

- Foot 89%
- Car 7%
- Horse 4%

Vulnerable Groups

Proportion of travel group members identified as vulnerable as indicated by KIs:

- 18% of children were unaccompanied or separated.
- 2% of travel group members were physically disabled.
- 13% of women were pregnant or lactating.

Population Left Behind

79% of KIs reported that within their travel group at least one member had left at least one family member behind in their previous residence.

Previous Location in Syria

Most commonly reported districts of most recent residence in Syria:

- Quamishli 29%
- Al-Hasakeh 18%
- Ras Al-Ain 18%
- Ain Al-Arab 14%

Push Factors

Most commonly reported reasons for displacement from Syria:

- Livelihood 29%
- Airstrikes in the area 25%
- Arrival of armed forces 25%
- Fleeing military enrollment 7%

Duration of Displacement Stages

7% of KIs reported less than 6 hours between the decision to leave their most recent location of residence and departing.

0% of KIs reported a waiting time of more than eight hours at crossing point from Syria to KR-I.

11% of KIs reported having spent more than eight hours at screening point in the villages of Al-Walid, Sahila and Kalhi in KR-I.

Time since leaving previous residence:

- 4% More than seven days
- 39% One day
- 57% Two to three days
- 0% Three to seven days

Secondary Displacement

25% of KIs reported that the majority of their travel group members were living in displacement in their previous residence.

10% of group members did not carry any form of identification papers, as indicated by KIs.

Movement Intentions

KIs were asked about the intentions of their travel groups both in the short term (in the two days following their arrival) and in the intermediate term (in the two weeks following data collection).

When asked about movement intentions of travel groups in the two days following data collection, 96% of KIs reported that they will be staying in camps and the rest were not sure what will be the next step.

When asked about movement intentions of travel groups in the two weeks following data collection, just over half (54%) of KIs reported intending to join family or friends in KR-I within this timeframe, while 21% reported intending to stay in the camps, 21% were unsure and 4% were planning to find a place of their own.

0% of KIs indicated that at least one member of their group intends to return back to Syria in the two weeks following date of interview.

</tr>
</tbody>
</table>

*KIs could select multiple needs or reasons. Therefore, results may exceed 100%.

1The most commonly reported reason for travel group members to not bring identification papers was that they were too young to have individual personal identification documents.

2Movement intentions of travel groups in the next two weeks were only asked to respondents who had indicated that they intended to move to a camp or options other than joining family and friends in KR-I or Dohuk in the next two days.
