The Rapid Response Mechanism (RRM) is a tool at the disposal of the humanitarian community to monitor humanitarian action, conduct multisector needs assessments (MSAs), distributions of non-food items (NFI) essential to households, shelter and water, sanitation and hygiene (WASH) interventions when there is no capacity on site. Currently, the RRM is made possible through the support of the European Union Civil Protection and Humanitarian Aid Office (ECHO), the Office of U.S. Foreign Disaster Assistance (OFDA), the British Department for International Development (DFID), the Swedish International Development Cooperation Agency (SIDA) and the Swiss Agency for Development and Cooperation (SDC). All RRM products are available on the Humanitarian Response portal.

2019 Coverage

In 2019, the RRM has monitored 14 out of 16 prefectures, with 3 operational partners and 5 bases: Action contre la Faim (ACF) (Bouar, Bossangoa), Solidarités International (SI) (Kaga-Bandoro) and ACTED (Bambari, Bangassou). The prefectures of Lobaye and Sangha-Mbaéré were not included, while coverage in Nana-Mambéré, Nana-Gribizi, Ombella-M‘Poko, Kémo, Haute-Kotto, Bamingui-Bangoran, Mbomou, Haut-Mbomou, Ouham and vakaga was only partial.

Exceptionally, the RRM intervened in the prefectures of Bamingui-Bangoran and vakaga. vakaga has seen several attacks by armed groups in Birao, resulting in an increased number of displaced people. Ndélé in Bamingui-Bangoran saw the return of formerly displaced persons from Chad due to a relative stability in the area. Furthermore, several RRM alerts were issued after floods along the Oubangui river and in Ouham.

In 2019, the RRM’s system of humanitarian monitoring issued a total 91 alerts, of which 44% were linked to violence.

Mandate

The RRM is designed to provide rapid humanitarian assistance following conflict-related shocks and natural disasters resulting in population displacement, as well as following shocks after the return of formerly displaced persons and shocks caused by epidemics. The RRM intervenes in coordination with the humanitarian community and provides shelter/NFI, WASH or High Energy Biscuit (HEB) assistance prioritising vulnerable populations and areas with limited response capacity. Three key pillars are defined in its mandate:

- Keep a humanitarian watch by means of rapid sectoral and/or multi-sectoral needs assessments in areas of displacement and return, and share results with the humanitarian community at large.
- Provide essential Shelter/NFI assistance to vulnerable populations, accessible since less than 3 months and when no other actor has the capacity to intervene rapidly.
- Provide access to drinking water and sanitation facilities (latrines, handwash basins etc.) to vulnerable populations accessible since less than 3 months and when no other actor has the capacity to intervene rapidly.

Methodology

The RRM intervenes to support:

- Displaced populations (at least 100 households) whose movement occurred within the last 3 months and/or who have only been reachable by humanitarian actors for less than 3 months.
- Returnees\(^1\) or spontaneously rapatriated\(^2\) populations (at least 100 households) whose return occurred within the last 3 months and/or who have only been reachable by humanitarian actors for less than 3 months.
- Host communities\(^3\) and particularly vulnerable groups of residents living in areas of displacement or return, where the RRM intervenes.

---

\(^1\) The term ‘returnees’ refers to people who have come back to their pre-crisis location following a period of internal displacement. \(^2\) The term ‘rapatriated’ refers to former refugees who have returned from neighbouring countries. \(^3\) The term ‘host community’ refers to individuals that have not been displaced as the result of a humanitarian-related event and are not hosting anyone in their home.

</tbody>
</table>

Vulnerable individuals identified in 2019, by status:

- Displaced persons: 17%
- Host community: 47%
- NFI beneficiaries: 24%
- Repatriates: 11%
- Refugees: 1%

429,255 vulnerable individuals (485,922 households)

Recommended interventions, by sector:

- Shelter/NFI: 92%
- WASH: 94%
- Health and Nutrition: 87%
- Protection: 87%
- Food Security: 81%
- Education: 79%
- Logistics: 43%

*Percentage of MSAs recommending an intervention in the sector concerned. **Percentage of interventions carried out by the RRM out of the number of MSAs recommending an intervention in the sector concerned. Ongoing activities are not taken into account.

Exploratory missions. Nutrition screenings. Cash transfer programming. The term 'host community' refers to individuals that have not been displaced as the result of a humanitarian-related event and are not hosting anyone in their home. The term 'returnees' refers to people who have come back to their pre-crisis location following a period of internal displacement. The term 'repatriates' refers to former refugees who have returned from neighbouring countries.

Distribution of beneficiaries in 2019

NFI distributions in 2019:

- **Number of beneficiaries, by prefecture**
  - no activities
  - 1 - 20,000
  - 20,001 - 40,000
  - 40,001 - 80,000

- **Number of beneficiaries, by intervention**
  - 1 - 5,000
  - 5,001 - 10,000
  - 10,001 - 25,000

- **NFI beneficiaries, by status and demography:**
  - **277,692** individuals
    - (57,290 households)
    - 231,562 individuals in 2018 (50,653 households)
    - 16% Boys
    - 13% Girls
    - 55% Men
    - 16% Women

- **WASH beneficiaries, by status and demography:**
  - **127,692** individuals
    - (180,658 households)
    - 82,732 individuals in 2018
    - 27% Boys
    - 26% Girls
    - 51% Men
    - 22% Women

Delays

The RRM aims to provide emergency assistance to affected populations in the shortest possible delays after a shock. However, the security context in the Central African Republic, as well as the types of displacement and protection issues characterising the ongoing crisis, pose significant constraints and challenges to the programme’s reactivity. Logistical constraints due to deteriorated roads during the rainy season complicate the work of the RRM team. A coherent methodology to monitor the delays of intervention was put in place by the RRM, which enables the identification of common hold-ups and informs the programme’s strategy to increase its effectiveness.

Time between an alert and the beginning of an MSA in 2019:

- **11 days**
  - Median between an alert and an MSA

Time between an alert and the beginning of an intervention in 2019:

- **34 days**
  - Median between an alert and an intervention

PDM in 2019

- **23** PDM conducted in 2019.
- **85%** Level of satisfaction:
  - Quality
  - Quantity

Tarpaulins and kitchen kits were perceived as the most useful items of the NFI distributions.

Activities carried out during WASH interventions vary according to the priority needs identified in each location. In 2019 WASH activities included, among others, the delivery of 207 hygiene sessions, the construction of 185 emergency latrines and the rehabilitation of 105 water points.
