Wildfire in Stanytsia-Luhansky raion, Luhansk Oblast as of 12:30, September 3, 2020

Methodology note:
On September 2, 2020, 24 wildfires broke out across an area of 1280 ha across Luhansk Oblast. The grassfire started near Stanytsia Luhanska and has since extended to Bolotene, an isolated settlement located within 1 km of the ‘contact line’. Reportedly, the fire caused at least ten detonations of mines/ERW. One SES firefighter was injured in an ERW explosion. Several inhabited houses were reported to have been destroyed, although no evacuations have yet been made (https://t.me/evakuv81). Active fire data from MODIS and VIIRS was used for rapid affected areas detection and fire spread monitoring.
