**Introductory Notes (2 minutes)**

Hello, my name is ___. I’m a part of the ___ Assessment Team. The information you will provide us will be used to inform response strategy and planning of humanitarian actors.

Please note that this meeting does not have any impact on whether you or your family will receive assistance in the future.
Please note that everything you tell us will be kept confidential. We are interested to hear all your opinions, both positive and negative. Names will be removed and your opinions will be anonymised. We cannot promise that your suggestions will always result in immediate changes, but your feedback is really important to us and will help specify how information will inform programming / decision-making.

You can decide whether you want to take part in the discussion or not. Once my questions have started, you have the right to refuse to answer any question, or to leave the discussion at any time. If you choose not to take part or to skip any questions, it will have no negative impacts whatsoever on your ability to access services from any agency. Please feel free to ask me any questions now, or at any point during the discussion. Do you consent to participate in this discussion?

This session will take no more than one and 15 minutes.

Ground Rules (2 minutes)

1. The most important rule is that only ONE person speaks at a time.
2. There are no right or wrong answers.
3. You do not have to speak in any particular order
4. When you do have something to say, please do so. There are many of you in the group and it is important that I obtain the views of each of you.
5. You do not have to agree with the views of other people in the groups.

Instructions to moderators

1. Questions to participants: these are the questions that should be read and communicated to the participants. If there are some specific vocabulary which may be unclear, do not hesitate to provide a definition for the purpose of the exercise. Please do not read the questions for female groups in a mixed group setting.
2. Probing questions: Probes and clarifying questions are an important part of interviewing and have two main purposes: 1) To help clarify what an interview respondent has said and 2) To help get more detailed information on topics of interest. Probes allow the interview respondent to provide more than just a one-sentence answer to the questions you ask. Do not read probing questions together with the questions to participants. Use or adapt them if necessary.
3. Gender dynamics: With all questions, it is critically important that we understand the experiences of female headed households as well as females in general. While we are having female only focus groups, which should create a safe space for frank discussion, in mixed groups, you must ensure that the women are speaking about their experiences. Please respect the responses coming from females and try to focus the discussions around these responses.
