* according to OSM extract from 27 March
** damage figures are the result of a rapid assessment and may be subject to change following more detailed QA/QC.
*** construction typologies by zone were gathered by REACH through participatory mapping with neighbourhood leaders. 1% of buildings in the area with each type of wall and roof were collected, and the remote-sensing damage figures were used to estimate total damaged buildings by type. Damage numbers may not reach total numbers damaged due to some areas not being classified by neighborhood leaders.
