More than 6 months or permanently
Do not know or choose not to answer

Notes:
1. These are indicative trends; REACH does not record all arrivals and departures.
2. Due to the negligible number of transits recorded, a detailed analysis of the dynamics of transiting households was not included in this fact sheet, apart from a short narrative section.
3. The matatu system involves buses that follow a set route in which passengers get on and get off at pre-determined stops. This means that many arriving passengers often get off at their stops before reaching Yambio town, while departing vehicles are nearly always full.
4. “Partial” in the sense that not all members of the HHs were travelling with the interviewed HHs.
5. Reported presence of services or opportunities is indicative of respondents’ perception and does not necessarily reflect availability.
6. In addition, physically disabled HH member was reported by 2%, and elderly by 1% of departing HHs.
7. In addition, lack of job opportunities was reported by 2% of arriving HHs.
8. Respondents could select multiple answers.
9. In addition, physically disabled HH member was reported by 2%, and elderly by 1% of departing HHs.
10. Percentages are rounded to the nearest integer, so responses may not add up to 100% exactly.
