Refugee Access to Livelihoods and Housing, Land, and Property

May 2019

UGANDA

CONTEXT

Uganda is currently hosting the largest number of refugees in the region with over 1.2 million refugees and asylum seekers, primarily from South Sudan, the Democratic Republic of Congo (DRC), and Burundi. Recently arrived refugees have joined Rwandese, Somali, and other refugees that have lived in Uganda for decades. Due to the large number of refugees, the range of countries of origin, and the varying lengths of displacement, there are key information gaps on how access to or lack of housing, land, and property (HLP) for refugees impact their potential for sustainable livelihoods.

In partnership with Norwegian Refugee Council (NRC), REACH conducted an assessment from 3 December 2018 to 15 March 2019 to collect baseline data on refugees’ access to livelihoods and HLP. The assessment aims to provide a better understanding of the conditions of refugee access to livelihoods and HLP, the linkages, and other factors influencing sustainable livelihoods and potential movement within Uganda.

METHODOLOGY

A mixed methods approach was used, driven by a household-level structured survey, semi-structured key informant interviews (KIIs) and focus group discussions (FGDs). The quantitative household-level survey produced results representative for the refugee population in 30 refugee settlements (considered as 25 due to five combined settlements in Adjumani) across 11 districts, as well as select divisions of Kampala (Makindye, Kampala Central, and Kawempe) with a 95% confidence level and 10% margin of error at the settlement level for all questions asked to the entire sample size. A total of 3,165 households were interviewed for this assessment. All questions referring to a subset are footnoted.

KIIs and FGDs were used to triangulate the data and provide context to quantitative findings. KIIs targeted settlement leadership, including Office of the Prime Minister (OPM) commandants and UNHCR staff, refugee welfare committee leaders, district local government officials, and key partners working in relevant sectors. Semi-structured FGDs were stratified by gender and conducted with refugee and host community groups in each location.

Findings in this factsheet are representative of refugee households living in Kyangwali refugee settlement. A total of 117 refugee households were interviewed in Kyangwali.

BRIEF OVERVIEW OF KYANGWALI IN KIKUUBE DISTRICT

Kyangwali settlement hosts more than 83,000 refugees. Due to its geographical location, Congolese refugees form the majority of the population. Refugees also come from Rwanda, Burundi, South Sudan, Somalia, and Kenya. In response to the influx of Congolese refugees entering the country since December 2017, Kyangwali has been receiving new arrivals.

TOP 3 HLP CHALLENGES

| Land accessed for cultivation | 58% |
| Land accessed for housing     | 32% |
| Property                      | 32% |

1 Figures based on United Nations High Commissioner for Refugees (UNHCR) and Office of the Prime Minister (OPM) population figures updated as of April 2019.
2 This question was only asked to the 16% of respondents facing HLP challenges. The level of confidence may thus be lower than 95%.
3 Respondents could answer more than one option for this question.
**Housing**

**TENURE ARRANGEMENTS**

- **% of HHs by shelter tenure:**
  - 84% Owned by the head of the household
  - 10% Owned jointly between household members
  - 3% Rented
  - 2% Other
  - 1% Owned by spouse

- **2% of HHs have documentation proving ownership or legal occupancy of shelter.**

**SHELTER CHALLENGES**

- **57% of HHs reported shelter damage. Of those, the most commonly reported parts of the shelter damaged are:**
  - Damage to roof: 69%
  - Damage to wall material: 48%
  - Damage to floor: 16%

- **34% of HHs reported not being able to conduct repairs. Of those, the most commonly reported reasons include:**
  - No money for repair: 91%
  - Material not available: 64%
  - No technician/labor available to repair: 18%

**ACCESS TO LAND**

- **% of HH reporting:**
  - Accessing land where shelter is located: 96%
  - Accessing land in a separate plot: 10%
  - No access to any land: 3%

**LAND**

**USE OF LAND FOR CULTIVATION**

- **70% of HHs reported using their shelter plot for cultivation. Of those, the following reported on sufficiency of the land to provide food for the HH in the most recent harvest:**
  - Insufficient: 61%
  - Sufficient: 39%

**FORMAL AGREEMENTS**

- **Of the 7% that access land around shelter plot through renting, free access, or ownership, 0% of HHs that have a formal agreement to access the land.**

- **Of the 24% of land accessed outside of shelter plot through renting, free access, or ownership, 33% are accessed through formal agreement.**

---

1 The Government of Uganda allocates land for residential and agricultural purposes, to refugees, irrespective of ethnicity and origin. This is done via OPM with the support of UNHCR.
16% of HHs reported facing HLP challenges. Of those:

Most commonly reported areas of HLP issues (% of HLP issues):

- Land accessed for cultivation: 58%
- Land accessed for housing: 32%
- Property: 32%

Most commonly reported types of HLP issues (% of HLP issues):

- Land grabbing: 35%
- Theft: 27%
- Plot given was unusable: 15%

HLP ISSUE RESOLUTION

10% of the 26 HLP issues reported were attempted to be resolved by the household.

Out of the HLP issues that HHs attempted to resolve, the following mechanisms were used:

- Help desk: 50%
- Family: 21%
- LC1 chairperson/local gov official: 21%

7% of the HLP issues reported were resolved.

PROPERTY

48% of HHs reported having no property at all. Out of the 52% who do:

HHs with income-generating property: 24%

Most commonly reported type of property:

- Solar panel: 28%
- Livestock: 24%
- Bicycle: 9%

86% of property items are owned by one owner.

Proportion of those by sex of owner:

- Female: 28%
- Male: 72%

29% of HHs that own property/assets reported having documentation proving ownership or legal access.

Most commonly reported sources and types of information HHs access:

- Family and friends: 51%
- OPM/UNHCR: 31%
- NGO: 29%

Type of information:

- Food distribution: 82%
- Registration: 49%
- Safety: 35%

92% of HHs reported trusting the information they receive.

Most commonly reported information needs of HHs by area:

- Food distribution: 55%
- Employment opportunities: 38%
- Safety: 28%
LIVELIHOODS SOURCES
Out of the 70% of HHs who reported having a source of income, the most commonly reported sources are:

- Casual labour: 33%
- Cash assistance: 32%
- Farming: 20%

Most commonly reported livelihood groups HH members participate in:

- Village Savings and Loan Associations: 16%
- Farmers’ group: 9%
- Savings and Credit Cooperative Organizations: 6%

Most commonly reported livelihoods challenges:

- Lack of work opportunities: 56%
- Lack of skills/qualifications: 33%
- Lack of credit to start/continue a business: 31%

SKILLS AND ASPIRATIONS
83% of HHs have men of working age and 90% of HHs have women of working age. Of those:

Most commonly reported livelihoods skills gained in country of origin:

- Farming: 54%
- Casual labour: 9%
- Livestock: 8%

Most commonly reported livelihoods aspirations:

- Farming: 26%
- Tailoring: 29%
- Driving: 19%
- Computer: 14%
- Hairdressing: 26%

MOVEMENTS WITHIN UGANDA

Most commonly reported reasons for moving:

- Presence of education services: 75%
- Presence of health services: 25%
- Joining other family members: 25%

100% of the HHs with at least one member who moved reported that they receive resources from the member that moved.

Most commonly reported reasons for planned movement:

- Presence of education services: 33%
- Security: 33%
- Other: 33%

PAST MOVEMENTS
% of HHs that had at least one member move in the year prior to data collection:

- 3%

Of those:

Types of destinations:

- Urban area: 75%
- Rural area: 25%
- Another refugee settlement: 75%
- Another site in same refugee settlement: 25%

MOVEMENT INTENTIONS
% of HHs that have at least one member planning to move in the 6 months following data collection:

- 3%

Of those:

Types of destinations:

- Urban area: 67%
- Rural area: 33%
- Another refugee settlement: 67%
- Another site in same refugee settlement: 33%
