

Cross-Border Population Movement Factsheet Akobo Port and Road Monitoring

Akobo County, Jonglei State, South Sudan

CONTEXT AND METHODOLOGY

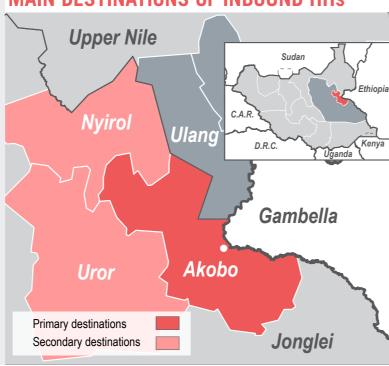

Akobo town is located in the eastern side of Akobo County, Jonglei State, close to the land and river border crossings with Ethiopia. Akobo is a key point of trade and transit between South Sudan and Ethiopia.

Since the beginning of the crisis in 2013, this route has been used by South Sudanese heading to or coming back from refugee camps in Ethiopia. In four locations, Gadrang Road, Koatkoangthor Road, Tundol Port and Market Port, REACH has recorded arrivals and departures of South Sudanese on a daily basis since May 2015.

In order to provide an indication of wider trends, data is collected on the volume of movement, as well as the motivations and intentions of those travelling. Due to insecurity and other issues, data is not always collected on a daily basis. To correct for this inconsistency, data presented for general movement trends across months represents an average based on the number of days of data collection each month. The data presented here is not representative, nor does capture all movements in and out of Akobo. Rather, it is indicative of movement trends for the assessed population¹.

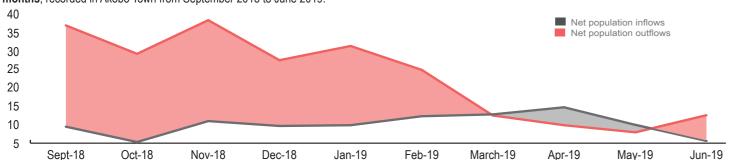

The following findings are based on primary data collected between 1 and 30 June 2019. REACH teams interviewed arrivals and departures at the household (HH) level. ²

MAIN DESTINATIONS OF INBOUND HHS

GENERAL MOVEMENT TRENDS²

Average daily number of individuals inbound to (grey) and outbound from (red) South Sudan with the intention to stay in their destination for more than six months, recorded in Akobo Town from September 2018 to June 2019:

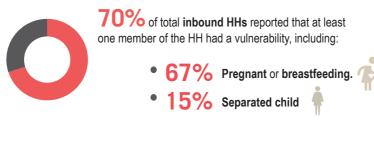

In June, average daily population inflows to South Sudan from Ethiopia have decreased, and outflows to Ethiopia from South Sudan have increased

Type of movement

Total monthly number of HHs and individuals recorded in June 2019:

	HHs	Individuals	%
Inbound to South Sudan from Ethiopia	99	471	41 %
Outbound to Ethiopia from S. Sudan	124	612	51 %
Internal movement within South Sudan ¹	20	111	8 %

Vulnerabilities³

Self-reported refugees

Proportion of inbound (left) and outbound (right) HHs who self-reported having refugee status in Ethiopia:

74% of total **outbound HHs** reported that at least one member of the HH had a vulnerability, including:

• 19% Self-reported malnutrition

INBOUND TO SOUTH SUDAN4

of inbound rins reported incomes in their final destination in South Sudan. of inbound HHs reported intending to stay more than six months

Demographics

Proportion of recorded travellers by demographic group:

79% of inbound HHs were partial HHs.5

Previous location in Ethiopia

Primary reported locations from which inbound HHs were leaving:

Jewi Camp	29%	
Kule Camp	28%	
Nguenyyiel Camp	21%	

Intended destination in South Sudan

Primary reported intended destinations for inbound HHs:

Akobo County	82%	
Nyirol County	14%	
Uror County	4%	I control

Push factors

Primary reported push factors for inbound HHs to leave their last location:

Distance from family/ home	61%	
Lack of work	16%	
Tensions with host community	10%	

Reasons for coming to South Sudan

Primary reported reasons for inbound HHs, March 2019 to June 2019:

	March 2019	April 2019	May 2019	June 2019
Rejoining family/ home	N/A ⁷	N/A ⁷	56 %	67 %
Security ⁶	36 %	28 %	19 %	10 %
Presence of jobs	9 %	12 %	11 %	16 %

OUTBOUND FROM SOUTH SUDAN

of outbound HHs reported intending to stay more than six months in their final destination outside of South Sudan.

Demographics

Proportion of recorded travellers by demographic group:

90% of outbound HHs were partial HHs.

Previous location in South Sudan

Primary reported locations from which outbound HHs were leaving:

Akobo County	85%	
Uror	8%	•
Nyirol	6%	

Intended destination in Ethiopia

Primary reported intended destinations for outbound HHs:

Jewi Camp	33%	
Nguenyyiel Camp	27%	
Kule Camp	20%	

Pull factors

Primary reported pull factors for outbound HHs to go to another country:

Presence of food distributions	35%	
Presence of family	24%	
Presence of health services	14%	

Reasons for leaving South Sudan

Primary reported reasons for outbound HHs, March 2019 to June 2019:

	March 2019	April 2019	May 2019	June 2019
Lack of food	48 %	38 %	29 %	37 %
Lack of education	24 %	19 %	19 %	14 %
Lack of health services	11 %	15 %	18 %	14 %

1. While internal movement within South Sudan was also recorded in Akobo over the period this factsheet covers crossborder movement only.

2. Respondents could choose more than one answer. A few of the HHs recorded during data collection were entering or exiting a different country than Ethiopia, however the data in this factsheet only reflects data regarding individuals travelling between Ethiopia and South Sudan. enects data regarding individuals travelling between Emilopia and South Sudan.

I. Vulnerabilities were collected at the household level and therefore can reflect multiple vulnerabilities of a single individual HH member or multiple vulnerabilities of different individual HH members.

Unless otherwise specified, these figures reflect trends for all HHs interviewed, regardless of the length of time that the HHs are planning to stay at destination.

Partial HHs are those where not all members of the self-identified family unit were reportedly travelling. Please note, family units in South Sudan often extend beyond the nuclear family.

The option choice 'security' for inbound households was most commonly reported as tensions with the host community in the Gambella region.

An additional option of "want to be home" was added to the survey in May 2019, and the value added to respondents reporting a desire to be reunified with family. Trends analysis cannot be determined.
